-- 1 (currently amended). A method of determining at least one parameter of a waveguide from wavefield data acquired from wave propagation in the waveguide, the method comprising the steps of:

obtaining a first and a second dispersion curves corresponding to different guided wave modes in the frequency domain from the wavefield data;

determining at least one parameter of the waveguide from a frequency interval between the first dispersion curve and the second dispersion curve;

obtaining the first and second dispersion curves in the frequency and phase velocity domain; [[and]]

determining the velocity of wave propagation in the waveguide from the dispersion curves as the asymptotic velocity limit of the dispersion curves; and

storing the determined velocity of wave propagation. --
